

Antivirus

How often have you had to deal with any of the following?

- › My computer is so slow all of a sudden. I can't work like this!
- › Whenever I want to surf the internet, I get loads of pop-up windows. It's so annoying!
- › I turned off certain settings for the apps on my computer but when I try to open some of them, a pop-up says that those settings are still on, although the admin account settings say they are off! Argh!
- › I don't know what I clicked on but I noticed a couple of days later that some of my documents were gone.

Not only are cyber threats annoying, they can also be costly to your customers, causing headaches and slowing down productivity. **Yet so often your customers only think about antivirus before it's too late.**

SYNAXON's Antivirus solution can identify where this key piece of software is missing on your customers' machines, and be rolled out as part of SYNAXON Managed Services Monitoring & Management. It scans and protects your customers' devices, you add this service to your customers' monthly invoices, and that's it!

Benefits

- ✓ Protect your customers' data from malicious virus attacks
- ✓ Prevent hackers from accessing your customers' devices
- ✓ Enable your customers to shop online securely
- ✓ Protect your customers' passwords from being stolen
- ✓ Sleep easy at night, knowing your customers are protected

Your customers know and trust you. You are the face of your business.
We simply support you behind the scenes to help you deliver great service.
