

Managed Endpoint Protection

Security for your
customers, more
margin for you!

The security of your clients' infrastructure is a top priority. If there are vulnerabilities in their systems, you're both taking a big risk.

However, we know that your customers are not always willing to make investments to minimise these threats, or sometimes, they simply don't understand them. Only you can help them understand the seriousness of the situation, but we can help you minimise these risks. From implementation and set-up, to pre-configuration of the tool according to best practices, through to monitoring your client's devices, we're here to save you time and effort.

It is no secret that the number of cyber attacks is increasing rapidly, and hackers are constantly finding ways to gain access to company networks, regardless of the size of the company. Investing in IT security is crucial - in the event of a successful attack on your customers, they (and you) will be dealing not only with the costs of the physical damage caused by such an attack, but also recovery costs and a potential loss of or damage to their reputation.

Benefits

- ✓ **Easy product handling saves you time**
Our product integrates into your processes to help you serve your customers more efficiently.
- ✓ **Automated processes save you money**
Predefined and automated processes from installation to incident response. Combines seamlessly with SYNAXON Managed Services Monitoring & Management.*
- ✓ **Simple to manage**
Web-based, pre-configured dashboards help save you time during licensing and administration.
- ✓ **1st class technical support**
Any updates, adjustments and customisations are included in your monthly fee.
- ✓ **Contracts made easy**
Product-specific service descriptions and sample contracts enable you to start selling quickly.
- ✓ **Get started right away**
No minimum licence purchase, plus monthly notice periods so you can stay flexible.

*SYNAXON Managed Services Monitoring & Management is optional but highly recommended.

Your customers know and trust you. You are the face of your business.

We simply support you behind the scenes to help you deliver great service, saving you time and effort through standardisation, automation and the years of experience our team provides.
