

SYNAXON Hub

Benefit from our purchasing power, consulting expertise and worry-free hardware rentals

As an IT reseller, you face a number of challenges when running your business day-to-day:

- › Have you been promised that goods are available and will be delivered promptly, only to be let down?
- › Are you tired of having to register your returns in countless different distributor portals, and a five day returns window is just too short?
- › Does the thought of having to get certified with big vendors for your project work give you a headache?
- › Are you tired of being stuck in the hardware rat-race with one-shot purchases that offer no customer loyalty and are looking for an alternative?

We are a hub for partners, distributors and manufacturers such as APC, Acer, Dell, HP, HPE, Lenovo and Microsoft, and strive to ensure goods are available to you at all times, by purchasing from both major vendors and authorised suppliers. With our buying power, and our own warehouse in the UK, we're able to ensure the availability of the most important commercial product lines, ensuring you remain competitive.

We support and advise you on upcoming projects, negotiate the best prices with vendors and pass the

savings on to you. With our elevated partner status with a number of manufacturers, we'll help you become more competitive, no matter how big or small your business.

And with our flexible business model for renting devices on your customers' behalf, you can offer them the flexibility and security they've been looking for without them (or you) needing to pay upfront. They benefit from secure, worry-free, and modern workstations; you benefit from monthly recurring revenues, better customer retention and more upsell potential.

Our commitment to you

Unparalleled service

Benefit from our product availability, 14-day return policy and centralised RMA processing.

We get the products you need; you stay competitive.

Project expertise

Save yourself time, money and stress when it comes to vendor certifications.

We get certified so you don't have to.

Out of the hardware rat race

Boost your margins by combining hardware, software and recurring managed services, all within a simple monthly plan.

We call it Managed Workplace.

Work with us and make it easy for yourself!
