

# Make the move to Managed Services with SYNAXON!

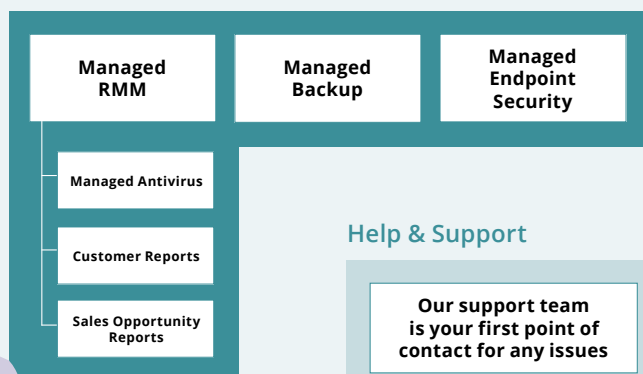

### Does any of this sound familiar?

- › I'd love to be able to serve more customers and do more billable work with the existing staff I have.
- › I wish I could better plan and predict my revenue streams.
- › I want to drive more automation and efficiency in my business.
- › Being part of a community of like-minded IT service providers, with whom I could learn and share ideas would be of huge benefit to my team members and me.

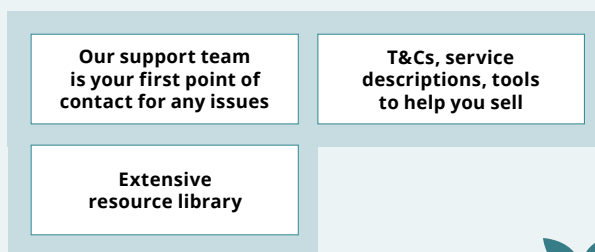

If yes, **SYNAXON Managed Services** might just be the answer. We know that making the move to Managed Services is complex, but we've made it easier with our product offering. It includes the tools you need to transition – out-of-the-box and pre-configured by our technical team – allowing you to focus on growing your business.

**Your customers know and trust you. You are the face of your business.** We simply support you behind the scenes to help you deliver great service, saving you time and effort through standardisation, automation and the years of experience our team provides.

### Help & Support

**SYNAXON**  
MANAGED SERVICES

Managed Services are designed to combine the routine maintenance and proactive monitoring of your customers' devices at a fixed monthly price. Supported by our team of experts, you can rectify issues before your customers are even aware of them, and work proactively to ensure they experience no downtime. No more needing to be in three different places at once. No more running around like a headless chicken. No more putting out fires. Transitioning to this model is not only great for you, it's great for your customers too.

So no matter how big or how small your company is, get fit for Managed Services with our range of products and services, and bind your customers permanently!
